WORK EXPERIENCE

Frontend Developer

Evolving Software

📅 Aug 2021 – Current 📍 Remote

- Collaborate with a small team of developers and UX designers to build, test, and improve web products for clients.
- Convert wireframes into functional React components.
- Wrote unit tests using Jest and Cypress to reduce the number of bugs in the application by 100%.
- In an agile environment, we perform daily stand-ups, weekly sprint planning, and sprint retrospectives.

PROJECTS

Wardrobe in Motion (WIM)

Frontend Developer - Evolving Software

- Built an e-commerce web app that allows vendors and content creators to collaborate to offer their products to customers.
- Used ReactJS, NextJS, Typescript, GraphQL and Tailwind CSS to build and update functional components.
- Built the landing page, navigation bar, and content management system to add, edit, view, search, and filter products/videos.
- Use Jest and Cypress to test out components and features before pushing code out to development.

Logistics For Hire

WordPress Developer - Evolving Software

- Optimized SEO rankings by optimizing images, changing titles and descriptions so that they include keywords.
- Updated UI and fixed missing/broken links.
