Skills

- Git
- HTML
- CSS / Tailwind CSS
- JavaScript / Typescript
- ReactJS
- Angular
- Java
- Figma
- GraphQL
- Jest / Cypress
- Storybook
- Responsive Design

Experience

Frontend Developer - *Evolving Software*

Aug 2021 – Current

- Meet with clients to determine which features are a priority and make modifications to the design based on their needs.
- Collaborate with a small team of developers and UX designers to build, test, and improve web products for clients.
- Convert wireframes to code to create interactive webpages.
- Perform daily code reviews to discuss issues, progress, and pull requests.

Projects

Wardrobe in Motion (WIM) - *Evolving Software*

- Built an e-commerce web app that allows users to either sell their products as a brand, create content for brands, or buy products through the shopper's feed.
- Used ReactJS, NextJS, Typescript, GraphQL and Tailwind CSS to build the landing page, navigation bar, shopping cart, and content management system to add, edit, view and search products/videos.
- Use both Jest and Cypress to test out components and features before pushing code out to development.
- Visit the beta site at: <https://beta.wardrobeinmotion.com/>

Recipe Collection – *Personal Project (work in progress)*

- Working on building a recipe collection web app that will allow users to create an account and save their favorite recipes.
- I was inspired to make this project since I have begun to learn to cook and wanted to save all my recipes in one place.
- Used ReactJS, Tailwind CSS, and db.json to allow users to create, delete, edit, and view recipes.
- Next, I plan to use MongoDB to allow users to create accounts and save their recipes.
- View the source code at: <https://github.com/MsNiyaJ/RecipeBook/tree/main/recipebook>

Education

Bachelor of Science in Computer Science & Applied Math

Graduated – May 2021

SUNY University at Albany

- Cum Laude (GPA: 3.5 / 4.0)
